PROFESSIONAL SUMMARY

CCBA-certified Business Analyst with over three years of experience across healthcare, media, and education. I map broken processes, turn stakeholder conversations into clear requirements, and build dashboards teams actually use. Comfortable in Agile and structured delivery environments. Hands-on with SQL, Power BI, Tableau, BPMN 2.0, and workflow automation including n8n. I pick up new industries quickly, which is part of why I have contributed meaningfully across three very different organizations in a short time.

SKILLS

Data and Analytics:	SQL (joins, aggregation, validation), Power BI, Tableau, Excel (advanced), KPI dashboards, reporting automation
Business Analysis:	Requirements elicitation, BRD/FRD, user stories, acceptance criteria, UAT, test cases, backlog management
Process and Change:	As-Is/To-Be mapping, BPMN 2.0, root cause analysis, gap analysis, change management, Lucidchart
Agile and Delivery:	Agile/Scrum, Waterfall, stakeholder workshops, sprint planning support, Jira (beginner), Confluence
Automation and AI:	n8n workflow automation, AI-assisted analysis, RPA concepts, prompt engineering, API integrations (conceptual)

PROFESSIONAL EXPERIENCE

Junior Business Analyst, Canadian Blood Services May 2025 to Dec 2025
Toronto, ON

- Worked with stakeholders across 3 operational teams to document current state workflows, identify root causes of reporting issues, and translate findings into requirements for 5 or more change initiatives in a regulated environment.
- Put together roughly 12 UAT test scenarios, walked users through testing, and caught 3 data issues before go-live that would have caused downstream reporting failures.
- Operated within an Agile reporting cycle, feeding BA findings and post-release quality results into bi-weekly sprint reviews and helping the team prioritize next-phase improvements.
- Produced BRDs and functional specs from stakeholder sessions, supporting technical teams through requirements validation and post-launch change management with affected business users.

Business Analyst, Canadian Jeweller Magazine Oct 2023 to Aug 2024
Toronto, ON

- Redesigned current state publishing and reporting workflows end to end, cutting manual reporting time by roughly 40% and improving reliability for leadership — from discovery through to go-live.
- Led change management for the new reporting tools: trained end-users, ran adoption sessions, handled resistance from the editorial team, and provided ongoing support until the team was fully self-sufficient.
- Maintained a prioritized improvement backlog, bridged the gap between editorial and tech, and built KPI dashboards tracking performance across 4 channels that gave the team data visibility that had not existed before.

Strategy Analyst, Edureka Jun 2022 to Aug 2023
Toronto, ON

- Built Excel and Tableau dashboards tracking enrollment, revenue, and engagement KPIs — became the standard tool for weekly team reviews and cut decision turnaround time by around 20%.
- Identified 3 process and market gaps through competitive analysis, contributing to a course expansion strategy that drove a 15% enrollment increase over two quarters.

EDUCATION

George Brown College Toronto, ON | Sep 2024 to Aug 2025
Postgraduate Program, Information Systems Business Analysis (Data Analytics)

York University Toronto, ON | 2023 to 2024
Business Administration Management

ILEAD College Kolkata, India | 2018 to 2021
Bachelor of Business Administration

CERTIFICATIONS

- CCBA (Certification of Capability in Business Analysis), IIBA
- ECBA (Entry Certificate in Business Analysis), IIBA
- Business Analysis and Process Management, Coursera

SELECTED PROJECTS

Hudson's Bay Business Analysis, KPI Case Study
• Analysed 9 years of KPI data across financial, operational, and customer dimensions. Modelled a \$450M recovery scenario using structured analytical methods.

Healthcare Operations Analysis — Tableau
• Built dashboards tracking patient wait times, clinic ratings, and blood donation outcomes, turning raw data into visible performance gaps.

Retail Sales Analysis — SQL
• Used SQL to uncover customer behaviour patterns, identify 4 underperforming product categories, and flag inventory imbalances affecting sales velocity.
